

To our CWT family and friends,

It is with great sadness that we share the passing of our dear friend and co-worker Dr. Miroslav Colic. Dr. Colic or Miro, as he was known to us. He has been an integral part of CWT's ingenuity and success since 1996. Revered for his unconventional brilliance in advanced water chemistry, Miro's contributions can be seen in factories and labs all over the world in hundreds of industries.

Born in Croatia,, Miro's passion for science led him to the University of Zagreb, where he received his Bachelor of Science degree in Chemistry in 1985. Impressed by the research being done at Cal Berkeley, Miro worked with top scientists to receive his Masters in Applied Surface Chemistry and Environmental Science and then his Ph.D. in Applied Surface and Colloidal Chemistry/Water Science with minors in Biophysics and Molecular Biology.

A true blessing to CWT in our formative years, Miro spearheaded ground-breaking R&D and pushed the experimentation to new heights in our industry. Miro's incredible acumen and passion for chemistry led him on a mission to discover the fundamental principles of how water behaved at its molecular level. Ahead of his time, many of Miro's research papers, some which are 25 years old, are being rediscovered and applauded by water experts around the world today.

In his role as Research Director at CWT, Miro constantly blazed the trail in innovative solutions for wastewater with his comprehensive analyses and problem-solving mind-set. Working alongside Miro was truly an adventure to see where his brilliance would take us. No problem was off-limits to solve. Miro's ground-breaking work made him a highly sought-after speaker at conferences in water, petroleum, and environmental science, engagements around the world.

This incredibly accomplished brilliant man was also simply a wonderful person who loved living near the beach, delicious food, his home laboratory, and the world of science.

We will miss our friend Miro profoundly.

Ariel Lechter
